

# Bahar Haidari

## FULL-STACK WEB DEVELOPER

---

### ABOUT ME

I am Bahar, a highly motivated and passionate full-stack web developer with extensive in both frontend and backend technologies. With 2 years of hands-on experience, my focus lies in crafting visually captivating and intuitive websites that leave a lasting impression. I am dedicated to delivering exceptional user experiences by seamlessly blending creativity, clean code, and industry best practices.

---

### EXPERIENCE

#### FREELANCER WEB DEVELOPER, STAN LUMISH, REMOTE.

DECEMBER 2022 – JUNE 2023

Developed a responsive website that can be optimized for different devices such as tablets, mobiles, and laptops.

Modified the layout of the website to enhance its visual appeal and functionality.

Added new JavaScript code to improve the website's performance and functionality.

#### FREELANCER WEB DEVELOPER, HASINA HAIDARI, REMOTE

April 2024, April 2024

Developed and designed a comprehensive, fully responsive website for the Faculty of Mathematics and Computer Statistics.

The site effectively details the activities of various teachers and groups within the faculty, providing users with a clear and organized view of ongoing and past initiatives.

Implemented a user-friendly layout to ensure easy navigation across all devices, enhancing accessibility and user engagement.

The project showcases my ability to translate requirements into intuitive web designs while maintaining a high standard of responsiveness and functionality.
